

Circulatory System Essay

Write a short essay (about 1 page) about someone you know that has had a medical problem involving the circulatory system. Some common conditions are:

- Hypertension (high blood pressure)
- Myocardial infarction (heart attack)
- Stroke
- Hemorrhaging (severe bleeding)
- Aneurysm (bulging large blood vessel, often bursts)
- Congestive heart failure
- Blood clot
- Heart Disease
- Leukemia
- High Cholesterol
- Birth defect of the heart

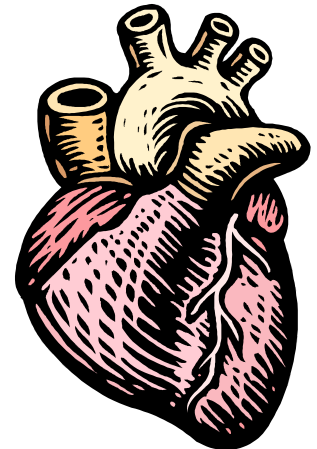

Include in your essay:

1. Who had the condition and their relationship to you
2. What the condition was and as much as you know about it
3. How it affected their life
4. How it affected the lives of others
5. What you know about how (and if) the condition could have been prevented
